

We are Qorvo®

Core RF Solutions

Qorvo At-A-Glance

- 8,000+ global employees
- Trailing 12-month revenue of \$3 billion
- Nasdaq: QRVO
- Radio frequency (RF) technologies for everything that connects the world
- Offering competitive advantages in manufacturing, product leadership, engineering, customer relationships
- Providing solutions for 3 key markets: mobile, infrastructure & defense

Centered on Customers

Drawing on more than 30 years of design expertise, Qorvo offers the core technologies for the RF products all around you. Our products and strategic foundry services help you shape and launch your most powerful new ideas for a broad range of mobile, infrastructure and defense applications.

Process Technology at the Core

Qorvo's success is driven in part by our investment in innovation and our deep design expertise in multiple semiconductor process technologies: GaAs, GaN, SAW, TC-SAW, BAW, Si BiCMOS, Si CMOS, SiGe and InGaP HBT. Qorvo engineers match the appropriate technologies to each product according to the best possible combination of price, performance and size.

Manufacturing Scale

Support large customers with high-volume manufacturing expertise

Product Leadership

Design and build high-value RF solutions to stringent customer demands

Systems Knowledge

Diverse engineering expertise spanning process, product and packaging technologies

Customer Relationships

Trusted supplier capable of solving customers' largest RF challenges

Accelerating a New Generation of RF

Qorvo offers the industry's broadest portfolio of critical enabling technologies to develop and commercialize tightly integrated solutions at industry-leading performance levels. We provide standard and custom product solutions for the mobile, infrastructure and defense markets. Qorvo has design, manufacturing, applications engineering and sales/support facilities around the globe.

Key Applications: Automotive | Base Stations | CATV Networks | Customer Premise Equipment (Wi-Fi Access Points and Smart Meters) | Defense & Aerospace | Gateways/Set-Top Boxes | IoT (Internet of Things) | Mobile Devices | Optical Networks | Radar | Satellites

Key Products: Amplifiers | Communication SoCs (Systems on a Chip) | Control Products | Discrete Components | Filters & Duplexers | Frequency Converters | Integrated Modules | Optical Components | Oscillators | RF Fusion™ and RF Flex™ Integrated Modules | Switches | Transistors and ICs

Our robust technology portfolio enables Qorvo to best deliver a variety of integrated modules.
